

# Happy 208th Birthday, Charles!

Darwin Day – Feb 12 Every Year

Charles Darwin, author of *On the Origin of Species* and father of the theory of evolution, was born on February 12, 1809, and published his book sharing his theory with the world fifty years later, in 1859.

Biologists and science geeks like me remember his birthday as Darwin Day every year.

**Happy 208th Birthday, Charles!**
